| Grannus   | 0.43 | 0.48 | 0.03 |  |  |  |  |  |  |

#### **Grannus - Orbital Parameters**

| Semimajor axis, km                   | 2,000,000,000 |
|--------------------------------------|---------------|
| Orbital eccentricity                 | 0.400         |
| Orbital inclination, degrees         | 7             |
| Longitude of ascending node, degrees | 130           |
| Argument of periapsis, degrees       | 20            |
| Sidereal orbital period, years       | 1,711         |
